Real World Instructions **Electric Safety Quiz** How to use an Energy Use Monitor

Safety First! Handling electric devices is no laughing matter. It's important to be careful and know how to protect yourself. Learn these 10 important tips well and ace the quiz below to earn 2 clams of salary.

1. Electrical devices aren't waterproof and should never be placed near water when plugged in. The device can be ruined if wet, but more importantly, you could get a nasty electric shock.
2. If an electrical cord is damaged (ripped, torn, broken, etc.), do not plug it in.
