

# Dr. Wickstrom's EDRE 4860 students second time simSchool

## Project Activities

### SIM MENTORING

On February 28, 2007 Dr. Wickstrom's class once again completed a single student simulation in simSchool. This time they were given a sheet that included all of the available tasks and comments. After they finished, the students registered for simBlog and entered their thoughts from the previous week about simSchool.
